TECHVISION CONSULTING INC.

A COMPREHENSIVE INTERVIEW GUIDE

Client: Manila Manufacturing Corporation (MMC)

Prepared by: Whayne Kristopher Del Moro

Course: DCIT 26 - Applications Development and Emerging Technologies

Instructor: Johneros Puyo

Date: September 12, 2026

INTERVIEWER INSTRUCTION

- The interview helps TechVision Consulting Inc. to understand Manila Manufacturing

Corporation's (MMC) current situation, their tech capabilities, challenges, and budget. The findings will be used to support a technology adoption recommendation report.

- Review the Module 1 core concepts (Emerging Technologies).
- Ask questions in order.
- For close ended questions, record the selected response and ask for an explanation when appropriate.
- Use questions such as "Why? ", "How? ", "Can you elaborate? ", "Can you give an example?"
- Record answers and note key statements.
- Target 20-40 minutes per session.

INTERVIEWEE INFORMATION

Full Name of Interviewee: _____

Job Title / Role: _____

Department / Division: _____

Email Address: _____

Date & Time of Interview: _____

BACKGROUND AND CURRENT STATE

1. Can you describe MMC's current production and business operations? Which process is most critical?

Response: _____

2. What technologies, software, machines, or information systems are currently used in MMC's operations?

Response: _____

3. What are the operational problems that MMC prioritizes solving? Why are these problems priorities? Can you give an example?

Response: _____

4. How will you rate MMC's current level of digital readiness? Why?

Response: _____

5. How does MMC collect, store, organize, and use customer related data? Who manages the data?

Response: _____

TECHNOLOGY AWARENESS AND READINESS

6. How familiar is MMC's management with emerging technologies? What technologies?

Response: _____

7. What emerging technologies has MMC already considered, tested, or used? What was the result?

Response: _____

8. How willing is MMC to adopt emerging technologies that will help the company?

Response: _____

9. What problems should MMC consider before using AI in its operations? **Response:**

_____

INDUSTRY AND COMPETETIVE ANALYSIS

10. What technology trends do you believe are affecting the manufacturing industry today?

Response: _____

11. How important is Industry 4.0 to MMC's future competitiveness?

Response: _____

12. Are MMC's competitors using technologies that could affect MMC's competitiveness? What are those?

Response: _____

13. What changes in customer, supplier, and producer do you expect as manufacturing becomes more connected and digital?

Response: _____

SPECIFIC TECHNOLOGY AREAS

14. What business problem would Artificial Intelligence (AI) solve?

Response: _____

15. Will using Augmented Reality (AR) for giving instructions, guidance, and real time information be helpful? Why?

Response: _____

16. Will using Machine Learning (ML) to improve forecasting, quality, maintenance, and other processes be helpful? Why?

Response: _____

17. What equipment, sensors, and devices will benefit from being connected to the Internet and communicating with other devices?

Response: _____

SKILLS AND CAPACITY

18. What technical skills does MMC currently have for implementing and maintaining emerging technologies?

Response: _____

19. Does MMC have employees who can work with data analytics, AI, ML, IoT, cloud systems, and AR tools? How advanced is their knowledge?

Response: _____

20. What training of employees need before adopting a new emerging technology?

Response: _____

21. What limitations are preventing the technology from working effectively? **Response:**

_____

BUDGET AND IMPLEMENTATION

22. Has MMC allocated a budget for digital transformation or emerging technology adoption? Is the budget planned as a one time or phased investment?

Response: _____

23. How much implementation risk is MMC willing to accept for an emerging technology?

Response: _____

24. What organizational or technical barriers could prevent successful implementation?

Infrastructure? | Employee readiness? | Data? | Management support? | Integration?

Response: _____

25. What would make MMC consider improving or successful after the implementation of emerging?

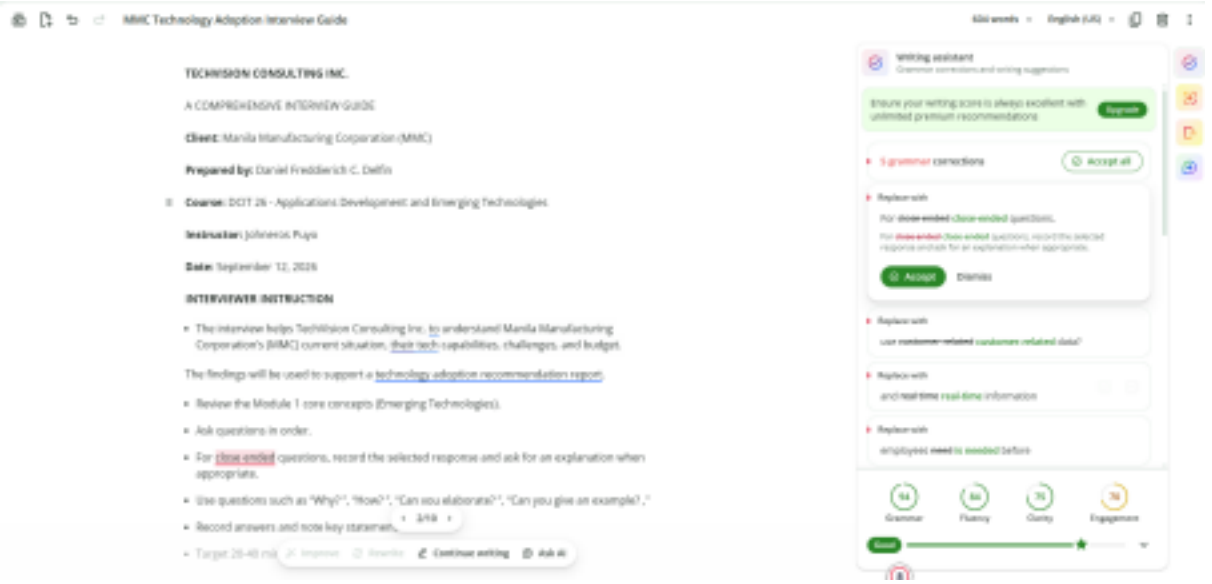

Response: _____

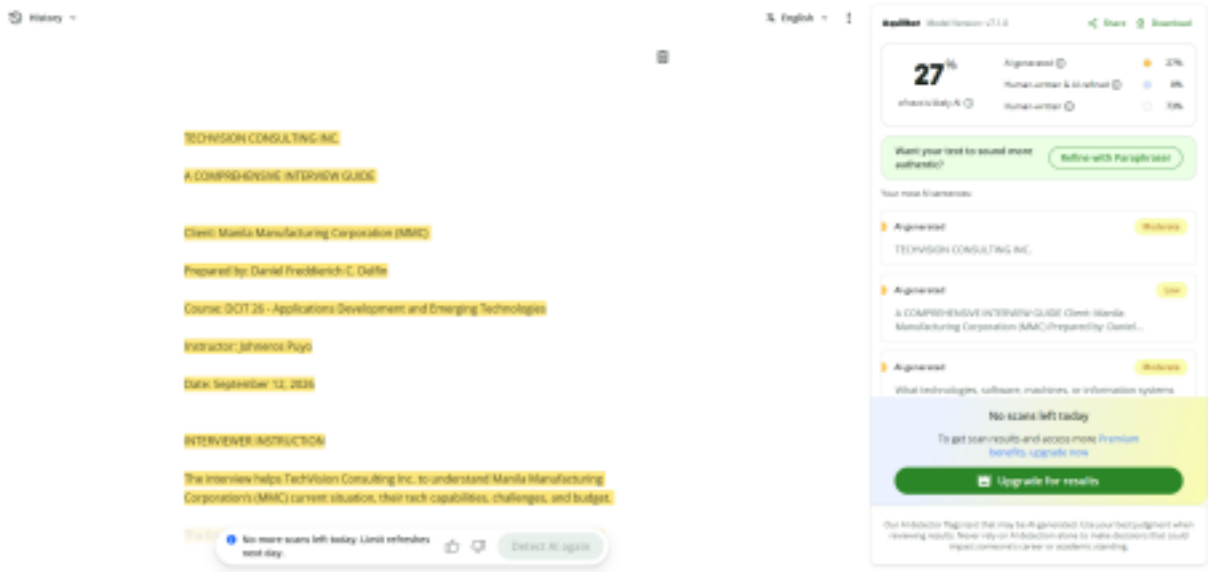

CLOSING

Thank you for sharing your time and insights. Your responses will help TechVision Consulting Inc. to understand MMC's current situation, priorities, and readiness. The information will be used as input to a technology adoption recommendation report.

RUBRIC

Criteria	Excellent	Good	Satisfactory	Needs Improvement	Score
Completeness of Sections	All 9 sections complete and well-organized	7-8 sections complete	5-6 sections complete	Less than 5 sections	/15
Question Quality	Questions are clear, relevant, and probing	Most questions clear and relevant	Some questions unclear or irrelevant	Many questions unclear or irrelevant	/15
Coverage of Emerging Technologies	ALL emerging technologies covered thoroughly	Most technologies covered	Some technologies covered	Few technologies covered	/25
Alignment with Scenario	Questions perfectly match the MMC scenario	Questions mostly match the scenario	Some questions match the scenario	Questions do not match the scenario	/10
Open-Ended Questions	Excellent mix with effective probes	Good mix with some probes	Some open-ended questions	Few open-ended questions	/10
Professional Format	Very professional, clean, and organized	Professional with minor issues	Somewhat professional	Disorganized or messy	/15
Practicality	Questions are practical and usable	Most questions are practical	Some questions are practical	Questions are impractical	/10

TOTAL SCORE: _____ / 100

FEEDBACK ABOUT THE INTERVIEW GUIDE

Overall feedback

The interview guide is organized and covers important areas needed to understand Manila Manufacturing Corporation's current operations and readiness for emerging technologies. The questions progress from the current state and technology awareness to industry trends, specific technologies, skills, budget, implementation barriers, and success measures. The closing statement also explains how the interview responses will be used.

Strengths

• The 25 questions cover both business needs and technology readiness.
• The guide includes AI, AR, ML, connected devices/IoT, and Industry 4.0.
• It asks about employee skills, training, budget, risk, infrastructure, data, and management support.
• Interviewer instructions encourage follow-up questions and recording key statements.

Suggestions for improvement

• Correct minor grammar and wording issues, such as "What training do employees need…" and the wording of Question 25, so each question is clear and professional.
• Question 9 and Question 21 should have the "Response:" label on a separate line, matching the other questions.
• For Question 24, ask the interviewee to explain which barriers apply rather than presenting a list without a clear response prompt.
• Add enough space for detailed responses, or use a separate answer sheet if the interview lasts 20–40 minutes.
• When possible, ask for examples or evidence to support ratings of digital readiness, risk tolerance, and implementation success.

Conclusion

This is a useful starting guide for collecting information for a technology adoption recommendation. Minor editing for grammar, consistency, and response space would make it easier to use during an actual interview.

PROPOSED RUBRIC — INTERVIEW GUIDE

The original file contains the heading "RUBRIC" but no readable scoring criteria. The rubric below is an added assessment rubric for this guide, not a transcription of a rubric supplied in the original.

Criterion	4 — Excellent	3 — Good	2 — Developing	1 — Needs improvement
Coverage and relevance	Questions comprehensively address the company's needs and readiness.	Most important areas are covered.	Several important areas are missing or shallow.	Questions are mostly unrelated or insufficient.
Clarity and wording	Questions are clear, concise, and professionally worded.	Mostly clear; minor wording issues.	Several questions are confusing or awkward.	Wording frequently prevents understanding.
Organization and flow	Logical sequence from background through implementation and closing.	Generally logical with minor flow issues.	Some sections are misplaced or repetitive.	Little organization or logical progression.
Emerging technology coverage	Relevant technologies and Industry 4.0 are explored with business context.	Most relevant technologies are included.	Technology coverage is limited or uneven.	Very little relevant technology coverage.
Readiness and implementation	Thoroughly covers skills, training, budget, risk, barriers, and success measures.	Covers most readiness and implementation factors.	Several readiness factors are not explored.	Readiness and implementation are largely omitted.
Usability and response space	Easy to administer; instructions and response areas are consistent.	Usable with minor layout or response-space issues.	Layout or response space often limits use.	Difficult to use in an interview.

Scoring: Add the six criterion scores (maximum 24 points). Suggested interpretation: 21–24 Excellent; 16–20 Good; 11–15 Developing; 6–10 Needs improvement.
